ABOUT ME

Motivated B.Tech student specializing in AI & ML with a passion for front-end and full-stack development. Experienced MERN stack developer skilled in React.js, Next.js, Node.js, and Express.js. Proficient in Solidity and Rust for smart contract development, with hands-on experience building dApps on Ethereum, Solana, and other Web3 ecosystems. Focused on delivering innovative and impactful blockchain solutions.

PROJECTS & EXPERIENCE

A blockchain Time stamping Platform

[Visit](#)

Ethereum, Web3

A DeSci platform that secures intellectual property through immutable, timestamped blockchain records. It ensures proof of existence, authenticity, and global accessibility for research and digital assets.

Kapda Ghar

[Visit](#)

MERN, Web2

Kapda Ghar is a fully functional Web2 clothing marketplace built using the MERN stack (MongoDB, Express.js, React, Node.js). It offers a seamless shopping experience with a wide range of curated fashion products, user-friendly navigation, secure payments, and responsive design. From browsing to checkout, Kapda Ghar ensures a smooth and modern e-commerce experience tailored for both everyday buyers and fashion enthusiasts.

XPMC lite 1

2024

Sister Nivedita University x Employability.life

XPMC Lite is a focused mentoring session designed to enhance industry-level performance and skill development. It provides practical insights, real-world guidance, and personalized support to help participants elevate their professional capabilities.
